PROJECTS

CozyHomes

📅 Date period

An online platform where users can list and rent homes, with functionalities for user accounts and property management

- Developed an Airbnb-inspired full-stack home rental platform
- Implemented user authentication (Sign Up / Login / Logout)
- Added property listing creation, viewing, and deletion
- Integrated image upload and cloud storage using Cloudinary
- Implemented interactive maps to display property locations
- Used MongoDB Atlas for cloud database management
- Designed a responsive UI using Bootstrap and EJS templates
- Deployed the application on Render for public access

Weather App

📅 Date period

A web application providing real-time weather updates for different cities, implemented with a clean and responsive design

- Built a responsive Weather App using HTML, CSS & JavaScript to fetch real-time city-wise weather data via API
- Added location-based weather search for multiple cities worldwide
- Deployed on GitHub Pages for public access and demonstration
